"Outdoor Living Room"

B. I. BOUWMUNS EXTURNS

Established 1892

LANCASTER, PA.

In the Garden Spot of America where Plants attain Perfection

In addition to a large range of greenhouses, two tracts of land, totaling about 100 acres of America's most fertile soil, comprise the facilities which make it possible for us to give purchasers of plants an unexcelled service.

The greenhouses, nursery office and nursery show ground are directly on the Lincoln Highway, on the western outskirts of Lancaster, Pa. It is from this point that all sales are made.

Conditions of Sale of "Will Grow" Plants

Prices in this catalog supersede previous catalog quotations, are f. o. b. Lancaster, Pa., unless otherwise noted, and subject to change without notice, owing to conditions beyond our control.

Cash should accompany order. Remit by postoffice or express money order, registered letter or bank draft. Postage stamps accepted up to \$2.00 in denominations of two cents.

Parcel Post Charges

Trees, Evergreens and Shrubs are too large to mail. On other orders that can be mailed please add 5% of the amount to cover postage, to points in Pennsylvania, New York, Connecticut, Rhode Island, New Jersey, Delaware, Maryland, Virginia and West Virginia; 10% elsewhere east of the Mississippi River; except to Gulf State and beyond the Mississippi, 20%. Minimum charge where required to cover cost of mailing, 10 cents.

Customers ordering by mail or allowing selection by us are assured their wants will be taken care of just as satisfactorily as if they had spent considerable of their own and our time necessitated in making their selections from the thousands of plants growing in our nurseries.

When plants are personally selected in the nursery the price will be in accordance with the value of the specimen selected, rather than catalog list price, plus 10% extra for selection and reservation.

Ideal Facilities for Shipping

Our shipping facilities are ideal, the Lincoln Highway, the Pennsylvania Railroad and the Reading Railroad, putting the nurseries in quick and easy communication with all points.

Free deliveries by truck within a radius of 35 miles can be arranged for when a full truck load of stock is purchased by one or more customers in a community. Beyond the free delivery zone mentioned, truck deliveries may be arranged for at a nominal cost.

Certified Plants Furnished

Only first-class plants, true to name, free from scale and fungus diseases, and that have been properly inspected by the State Nursery Inspector, are used in filling orders. A Certificate of Inspection from the Pennsylvania Bureau of Plant Industry will accompany each shipment.

Deciduous Trees and Shrubs can be planted frequently in late Spring after growth starts if Balled and Burlapped. For this extra work there is an additional charge as follows: Shrubs, 25 to 35c: Trees, 2-3 ft., 25c.; 3-4 ft., 40c.; 4-5 ft., 60c.; 5-6 ft., 75c.; 6-8 ft., 95c.; 8-10 ft., \$1.25.

All Plants Genuine and True to Name

We exercise the greatest care to have all stock genuine and true to label, holding ourselves ready to refund the purchase price or to replace any plant that proves untrue. We do not give any warranty, express or implied; and in case of error on our part, it is mutually agreed between the purchaser and ourselves that we shall not be held responsible at any time for a greater amount than the original price of the goods.

Guarantee on "Will Grow" Plants

We guarantee all plants to be freshly dug for each order and to arrive in good condition. Each plant sold is subject to customer's approval on a "Money Back If Not Satisfied" basis.

Notify us within ten days if any plant is unsatisfactory, so it can be returned at our expense, as we will not be responsible for losses on plants after they are set out. Due to the careful manner in which all "Will Grow" plants are nuttured (no expense being spared to produce plants of greatest beauty and power to grow), customers rarely suffer a loss when transplanting is properly done in good soil; followed by furnishing the plants with an abundance of water, which is urgently required the first summer at least, even in addition to a normal rainfall.

B. F. BARR NURSERIES, Lancaster, Pa.

WHAT MAKES DEPENDABLE PLANTS?

Prospective planters before ordering usually and wisely read a number of nursery catalogs to get an idea of their respective offerings of plants, comparing descriptions, sizes and prices. What, however, measures the true value of a plant? How can the needs of economy with true satisfaction be met best?

A too common error is to associate price with size, often with very discouraging results. The proportion of plants that thrive and please is the only measure of the true cost of a planting.

Two Essentials Plants Must Possess to Warrant Planting

To thrive and please, plants must have two ingrown fundamentals: First, they must have full vigor to thrive after being transplanted to your grounds; second, they must be a well-grown, finished product of real beauty if they are expected to beautify.

Causes That Lead to Production of Thrifty Plants

Full vigor to grow and thrive is the result of a number of causes. Soil advantages in the nursery stage plays a prominent role. Properly nurtured plants can only be produced in a soil of exceptional fertility. It is in such a soil that "Will Grow" plants are nurtured, for the B. F. Barr Nurseries are situated in the heart of the richest producing soil to be found in America—this having been very appropriately called "The Garden Spot of America."

Money Saving Advantages Gained by the Purchaser

Cultural methods practiced in the nursery for plants leing grown to transplant and thrive are just as important. No operation that will make for vigor and beauty can be slighted, even if it does increase the cost of production. Unsurpassed rootsystems only come from constant root pruning or frequent transplanting; and above-ground beauty from careful attention to proper trimming and shaping. Both of these add to production cost, fully justified in the incomparable advantages gained by the purchaser.

Thus are "Will Grow" Plants grown. It is no wonder then that they possess true character—a close, compact beautiful growth, and quick recovery after transplanting—a money saving advantage.

Height Alone Not a True Measure of Value

On the other hand, plants that do not receive the same constant care that "Will Grow" plants do, strange as it may seem, will grow to usual catalog specifications much quicker and far more cheaply, but at the expense of all those desirable attributes necessary for successful results in transplanting and in appealing beauty. When not constantly pruned and shaped, height is gained without any sacrifice; when not root-pruned frequently, growth also goes into unchecked height instead of into the production of a fibrous root system so necessary for transplanting with success.

"Will Grow" Plants That Give Most Satisfaction Are Really Cheapest

"Will Grow" plants are the production of a painstaking system based on the undeniable fact that the value of a plant is not measured by height as much as by its general sureness to transplant successfully and to give the beautifying result expected. So, "Will Grow" plants are better plants. Although more costly to produce they are really cheapest because most satisfying in the end. To purchase Barr's "Will Grow" plants is to secure advantage of our better cultural methods bringing a distinct gain to you in your planting.

Every purchaser of a "Will Grow" plant is assured of a freshly dug plant. We do not carry any stock in storage. If we were more interested in the profits we could make than in your success with your planting we could dig the plants in large quantities cheaply in the Fall and carry them over Winter in storage to be used in filling Spring orders. Because we do not want our customers to receive inferior plants and only those best fitted to make successful growth, we go to the trouble to dig each plant fresh in filling every order.

Every Home Should Have an Out-Door Living Room

From April to October everyone takes advantage of all occasions to enjoy the out-doors. There is a strong desire to be out where the air is pure and to enjoy the freedom of space. What could be more attractive, appealing and satisfying than an additional room out-doors,—a real Out-door Living Room!

Great Enjoyment at Little Cost

A floor of green, velvety grass; walls of beautiful Trees, Evergreens and Shrubs to set the room apart and screen it from view; Blooming Plants for decoration and fragrance; a few Trees for cooling shade.—and the result is an Out-door Living Room as delightful as any one could dream, giving countless hours of enjoyment and satisfaction. All at small expenditure in effort and money!

The Out-door Living Room idea is sweeping the nation. For best use and enjoyment it should be planned as an extension of the indoor living room.

All the Necessaries Listed in This Catalog

Maybe you, too, have promised yourself to transform the "back yard" this year into an added room of appealing beauty. It will pay you at once in the added comforts you will enjoy. Ultimately if you seek to sell your property you will be rewarded, too, for the increased value it will command.

Everything you will need in making your Out-door Living Room—from Grass Seed for the turf, to Trees, Evergreens, Flowering Shrubs and Vines for living walls and decorations—you will find listed in this catalog.

How To Develop an Out-door Living Room

In planning your Out-door Living Room, leave the center open by arranging plantings in graceful curving lines along the boundaries. Blot out all unattractive views with plants. Plant tall, pyramidal Trees or Evergreens to shut out buildings close by, and vines to scramble over fences, up telephone poles and to cover garages. Use Evergreens to effectively curtain any unpleasant object twelve months out of the year. The cheapest wall or fence—and the best—is a living hedge. It does not have to be painted, but gives itself a new coat every year. It will screen out views or shut out trespassers most effectively and afford real privacy. Recesses formed by an irregular boundary planting will provide delightful nooks that await you.

Any information along this line which you may wish we will be very glad to give if you will submit your problems to us.

The "Outdoor Living Room" is an ideal addition to a home. A border planting, with the privacy it affords, soon will change the unattractive, useless plot of ground into what in many months of the year is the most appreciated part of the home.

Evergreen Trees and Shrubs

SUITABLE VARIETIES OF EVERGREENS FOR A PORCH FOUNDATION PLANTING

The varieties of Evergreens used in the above planting are the following corresponding with the numbers shown: 1—American Globe Arborvitae. 2—Chinese Arborvitae. 3—Golden Plumed Retinospora. 4—Silver Redcedar. 5—Dwarf Japanese Yew. 6—Lee Golden Arborvitae. 7—Redcedar. 8—Silver Redcedar. 9—American Globe Arborvitae. 10—Yellow Column Arborvitae. 11—Upright Japanese Yew. 12—Pyramidal Arborvitae. 13—Yellow Column Arborvitae. 15—Schott Redcedar. 16—Giant Arborvitae.

FOR all-year round beauty, usefulness and lasting qualities Evergreens have become greatest factor in beautifying home grounds and larger landscapes.

Evergreens as a class have so many varied shapes, sizes, hues, and such a great adapta-

bility that there is a variety for any situation or special purpose. There are low, medium, and tall growing Evergreens; round, conical and pyramidal; blue, green, golden and silver, etc. The different varieties give an opportunity for wonderful combinations and effects. For Foundation Planting, for single or massed plantings on the open lawn, for lining walks, or for hedges, there is a choice of Evergreens for every purpose.

Evergreens One of Our Specialties

Beautifully shaped, wonderfully bushy, and richly colored, Barr's "Will Grow" Evergreens will give real beauty to your property.

By our special process of production which includes removal of one-half to two-thirds of the previous season's growth, and root-pruning done periodically, Barr's Evergreens gain these superior qualities:

- 1. Unmatchable beauty of form and bushiness not found in plants unsheared from year to year in the Nursery whereby height might be secured quickly and cheaply.
- 2. Perfected net-work o' roots, insuring power to continue beautiful growth after transplanting to your property.

If Barr's "Will Grow" Evergreens sell slightly above the price of ordinary evergreens (justified by greater care in production) their superior qualities make them more than worth the difference to anyone who desires superior results in surer growth and greater beauty. There is no substitute for Quality,—not even Price.

All "Will Grow" Evergreens are shipped with a ball of earth encasing the roots and a secure covering of burlap to prevent the ball from breaking while in transit.

Abies—THE FIRS

Stately, handsome Evergreens of compact, pyramidal form and symmetrical outline; whorled, spreading branches; leaves flattened, usually grooved and lustrous. Show to best advantage as specimens. Abies concolor, the only one of this species that we offer, is the most satisfactory of the Firs for general ornamental planting.

Chamaecyparis—THE RETINOSPORAS

Well worth any special effort to possess are Retinosporas. Their only requirement is a moist soil and protection from cold winds in exposed places. Their graceful habit of growth and soft, fine foliage make them favorites among Evegreens. Specimens attain unusual beauty and become sources of life-long pride and pleasure. They cannot be too highly recommended for foundation and lawn planting.

The Plume Retinospora with its distinct pyramidal outline, and beautiful, soft foliage, which is characteristic of all Retinosporas, is very ornamental.

C. obtusa-HINOKI CYPRESS. Strong, pyramidal tree with horizontal, fern-like branches, drooping habit. Foliage light green and shiny, somewhat whitened beneath.

Juniperus—THE JUNIPERS and CEDARS

For diversity of form, size and color, suitable for any situation, together with hardiness, the Junipers have no peer. Will thrive in any soil. Varieties may be had from the quite prostrate to the narrow columnar. The most desirable of the medium-sized Evergreens for its uniformity of texture throughout the year.

J. chinensis columnaris—COLUMNAR CHINESE JUNIPER. Cone-shaped; formal habit; beautiful grey-green foliage, especially rich in color in

Picea—THE SPRUCES

Very ornamental Evergreens are the Spruces, which are valued especially for home decoration and park use. They are magnificent in appearance, being pyramidal in outline and with branches commonly arranged in circles or whorls. They are rapid growers and perfectly hardy. Strikingly effective in the winter landscape when covered with a snowy mantle.

Koster Blue Spruce—most highly colored ornamental Evergreen. Becoming scarcer and more sought after each year.

P. alcockiana—ALCOCK SPRUCE. Of close, graceful habit; slender, spreading branches, leaves rigid, 4-sided, but flattened, sharp pointed; dark green above, silvery beneath.

WHEN AND HOW TO TRANSPLANT EVERGREENS

Evergreens transplant best during the Spring months, before and just as new growth is beginning, or for several months following August 15 when the new growth is completed and has become sufficiently hardened.

The excavation for planting should be considerably larger and deeper than the encased roots so as to allow liberal space around the ball for filling in with good soil. Do not remove burlap until tree is in hole. Carefully pack soil under earth ball and when hole is two-thirds refilled, flood with water.

In restoring the remainder of the excavated soil, allow a shallow basin to remain around the tree to collect the rain and enable it to soak into the ground. Mulch with well-rotted manure or straw to conserve the moisture in the ground and keep it from becoming hard. In the Fall mound the soil against the plants.

Frequently direct a strong force of water against the under side of the foliage, when the sun is not shining to preserve the vigor and beauty of the plant.

Pinus—THE PINES

Most valuable and majestic Evergreens for permanent planting are the Pines, which as they grow older gain in character and picturesqueness. Generally whorled branches, bearing clusters of long, needle-shaped leaves. Will endure wide range of soil and climate and are so diverse in character, from the tall, upright forms to the dwarf varieties, as to make them available for specimen planting on the smallest lawn or on vast estates and parks.

How "Will Grow" Evergreens are Grown, Dug, Shipped

Unequalled soil, frequent transplanting, and constant shearing give "Will Grow" Evergreens their great vigor and power to grow, their mass of fine, fibrous roots so necessary for success in transplanting and their bushy, symmetrical form. Each "Will Grow" Evergreen is carefully

hand-dug so as to obtain a large ball of soil to encase the roots. For additional protection against disturbing the roots each earth ball is securely burlapped. Careful packing, as a guarantee of safe arrival, completes the steps by which "Will Grow" Eyergreens reach our Customers in the best possible condition to insure success in the hands of the planter.

Our catalog prices include balling, bur-

lapping and packing of Evergreens up to 4 ft. but for larger Evergreens to be packed for transportation the cost of packing will be

Shipments of "Will Grow" Evergreens, unless otherwise provided for, are made by freight as we find that method satisfactory and most economical for the customer.

Taxus--THE YEWS

Handsome dark green foliage, adaptability to part shade, semi-dwarf habit, and refined and distinctive appearance give the Yews their high value as Evergreens for foundation and other ornamental planting. They succeed well in most soils and in part shade.

T. baccata repandens—SPREADING ENGLISH YEW. Of low, spreading habit; foliage glossy dark green. Excellent for edging the foundation planting; thrives best in shade.

12-15	in.	spread.				,				\$3.00
15-18	in.	spread.								3.75

T. cuspidata—JAPANESE YEW (Spreading Form).

Most vigorous of the Yews; very hardy; its dark, green foliage will retain its color through Winter. Its low, spreading habit and rich color make it excellent for foundation planting.

10-12 in. high x 12-15 in. wide...\$3.00 12-15 in. high x 15-18 in. wide... 4.00 15-18 in. high x 18-22 in. wide... 5.00 18-24 in. high x 22-24 in. wide... 6.50

T. cuspidata capitata—UPRIGHT JAPANESE YEW. Close, upright and compact grower; foliage dark green; fruit, bright scarlet. Hardiest of the Yews; excellent in masses and invaluable for hedges.

Two Evergreen Collections That Will Win Friends for Barr's "Will Grow" Evergreens

10 Evergreens \$20.00

- 2 Oriental Arborvitae, tall growing, green, 24-30 in.
- 2 Pyramidal Arborvitae, tall growing, green, 24-30 in.
- 2 Globe Arborvitae, dwarf growing, green, 12-15 in.
- 2 Pfitzer Juniper, dwarf growing, green, 12-15
- 2 Dwarf Golden Oriental Arborvitae, dwarf growing, golden, 12-15 in.

An especially fine group for planting in front of porch, or along house. A beautiful decoration for any space 12 to 16 ft. long by 3 to 4 ft. deep.

All 3 times transplanted and balled and burlapped.

2 Orders to same address \$39.00.

Triangle Group \$9.00

- 1 Canadian Hemlock, 30-36 in.
- 1 Lee's Golden Arborvitae, 30-36 in.
- 1 Pyramidal Arborvitae, 30-36 in.

A splendid group for planting at one side of door or path, or at corner of house, or on the lawn for a grouped assortment.

All 3 times transplanted and balled and burlapped.

2 Orders to same address \$17.50.

Prices for these collections include cost of balling and burlapping for successful planting, packing and delivery to transportation company in Lancaster.

Thuja—THE ARBORVITAES For general popularity and extensive use, trimness and variety of form and beauty

of coloring, adaptability and hardiness, the Arborvitaes are unsurpassed.

Their clean, neat, compact appearance and soft foliage make them appropriate for the foundation planting where they are almost indispensable, and for specimen planting on small lawns as well as large areas; in grouping, bedding, bordering and formal gardening. They are often planted for hedges. In window boxes they give an attractive effect.

Here are shown the American Arborvitae, a well-shaped, reliable tree, and the American Globe Arborvitae (inset), a very hardy variety well adapted to foundation planting.

T. oc. globosa—AMERICAN GLOBE ARBORVITAE. Grows naturally in ball-like form. Slender branches with light green foliage. Very hardy.

American Globe Arborvitae, but denser

in habit; very hardy.

1½-2 ft...........\$3.75

T. oc. lutea—GEORGE PEABODY ARBORVITAE. Tall and columnar; bright golden foliage retained throughout year. Makes attractive color contrast with

green varieties.

2-2½ ft....\$3.50 | 2½-3 ft....\$5.00

3-3½ ft....\$6.50

oc. pyramidalis—PYRAMIDAL ARBORVITAE. Narrow and columnar in growth; denser and darker green than American Arborvitae.

American Arborvitae.

T. caroliniana—CAROLINA HEMLOCK. Denser in growth than T. canadensis, and with heavier and darker green foliage; a truly magnificent variety.

3-3½ ft.....\$9.00 | 3½-4 ft.....\$10.50

Canada Hemlock is graceful in habit, and its distinct, small foliage is of a pleasing shade of green. It endures shade better than some of the other trees and stands clipping readily.

Trees, evergreens and large shrubs cannot be sent by parcel post.

ft..... 7.50

Broad-Leaved Evergreen Shrubs

The splendid plants hold their rich green foliage all the year round and many varieties make a magnificent showing of bloom. Shaded situations are perferred by most of the varieties, giving them an added value in making them available for planting about the north foundations of houses or in shady corners.

Abelia grandiflora always appeals in the foreground of plantings or in masses by itself. Its dainty, fra-grant, white flowers are a delight from midsummer until freezing weather arrives.

Abelia—ABELIA

A. grandiflora-GLOSSY ABELIA. Dwarf shrub, evergreen in the North when protected. Gracefully arching branches, shining dark green leaves; dainty, waxy, pinkish-white, fragrant flowers, persisting from midsummer until late autumn.

Azalea—AZALEA

amoena-HARDY EVERGREEN AZALEA. Bright rosy-purple, double flowers in Spring in great masses. Leaves small, bronze-brown in Winter. 3-4 ft.

A. hinodegiri—CRIMSON EVERGREEN AZA-LEA. Taller growing than A. amoena, and bearing bright red, double flowers; very showy. Its deep green leaves turn reddish in fall. 3-4 ft.

Rhododendron—RHODODENDRON

Beautiful shrub with thick, smooth, glossy, evergreen leaves. The Rhododendron is a very effective plant used in masses or groups or near dark-foliaged evergreens. It is excellent for the shaded corner or on the north side of the house.

The Rhododendrons here listed are nursery-grown, and acclimated, and have had the benefit of careful transplanting by which they have gained root systems which will cause them to make ready growth and thrive for you much better than ordinary collected plants.

Rhododendrons (and Azaleas) require acid soil for best results, and should be planted in a mixture of three parts leaf mould or Holland Peat to one part soil. In limestone localities the broadcasting of $1\frac{1}{2}$ pounds aluminum sulphate to each square yard of surface, Spring and Fall, will prove highly beneficial in acidifying the soil.

Shade and Ornamental Trees

Whether it be for shade or for ornament the Deciduous Tree is a necessity for the home grounds. In the wealth of their stately trees lies the beauty of many old homesteads. New homes without trees, which add to their desirability, comfort and value, stand out bare and repellant.

..фi==

WRONG WAY TO PLANTA TREE

Figures accompanying the various descriptions indicate the ultimate height which that particular variety will attain when grown to maturity. ··фiliф··

HOW TO PLANT A TREE

Immediately on arrival of trees unpack carefully, protecting the roots from sun and air. Plant in holes dug much larger than the spread of the roots so that the latter can be carefully placed in their natural directions. Fill the hole with good surface-soil mixed, if possible, with one-fourth its bulk of well-rotted stable manure.

The tree should stand two inches deeper than it did in the nursery. Work the soil firmly under and about the roots. When the hole is two-thirds filled, water thoroughly to set soil about roots and furnish moisture to the tree in abundance. Complete the filling of the hole with soil, then mulch with strawy manure spread three inches deep over the whole area of the tree hole.

Before setting the tree trim the branches by removing three-fourths of last year's growth, using a sharp knife to make a clean cut.

The Home to be Loved, Must Be Made Lovely.

RIGHT WAY TO PLANT A TREE

The Norway Maple is generally recognized as one of the finest medium-sized trees for street planting or for single lawn specimens.

Acer—THE MAPLES

The most extensively planted shade tree, popular for street, lawn and park uses. Will grow successfully almost anywhere. Hardy, vigorous grower.

A. platanoides-NORWAY MAPLE. Handsome, round-headed tree with broad, smooth, deep green leaves, holding color till late in Fall, when they turn attractively golden. 50-75 ft.

When to Plant

Deciduous Trees, Shrubs and Vines. From the time the ground opens in the Spring until the plant starts to make growth, and again from the time the wood is ripened and the leaves begin to fall in the Autumn until the ground is frozen. (March 15 to May 15, and Oct. 1 to Dec. 10.)

Coniferous and Broad-leaved Evergreens. After abundant rains of August to late Fall, and in the Spring until the new growth starts. (April 1 to June 15 and August 1 to November 30.)

Perennials. Spring or Autumn. (April 1 to June 1 and Sept. 1 to Nov. 30.)

Grass Seed. Spring or Autumn. (March 25 to June 1 and Aug. 1 to Oct. 1.)

Allow 5 to 10 days for filling orders received during the shipping season, as orders are filled in rotation. ORDER EARLY.

Magnolia—MAGNOLIA

Extremely attractive lawn trees: with solitary. but conspicuous, fragrant flowers in lavish profusion. American varieties flower after the leaves appear: oriental, before, and more profusely.

American Magnolias
M. glauca—SWEETBAY. Handsome, small tree with large, globular, creamy white, and very fragrant flowers 2-3 in., across; fruit pink and

ters: large white flowers, surrounded by spray of leaves. Fruit rose colored, cone-like. 30-40 ft.

	t	
8-10	ft., 1½-1¾ in. cal	5.00

The fine symmetrical outline of the American Linden makes it one of the most desirable trees for lawn, park or avenue. It is fast growing and beau-tifully leaved. Rarely attacked by insects.

VALUE IN TREE PURCHASES

Comparison in tree values should not be based on height alone. A better measure of value is in caliper—the diameter of the trunk 1 ft. above the ground. This is a better representation of age and stockiness than mere height often gained in spindly growth at the expense of the vitality of the tree.

Trees for Special Purposes

Street and Avenue Planting

American Ash, American Elm. Scotch Elm, American Linden, Pin Oak, Red Oak, Norway Maple, Sugar Maple, Maidenhair Tree, European Plane.

Beauty of Autumn Foliage

Red Maple, Sugar Maple, Dogwood, Red Oak, White Oak, Sweet Gum, Tulip, Thorn, White Ash, Hickory.

Flowering Effects

Dogwood, Red Bud, Horse Chestnut, Mag-nolia, Flowering Crab, Hawthorn, Red Maple, Goat Willow, Flowering Cherry, Flowering

Colorful Fruiting Effects

Red Maple, Dogwoods, Thorns, European Mountain Ash, Flowering Crabs, Umbrella Magnolia, Corktree, Flowering Cherries.

Ornamental Deciduous Shrubs

Shrubs are the "decorative furnishings" for the home grounds, and without this important feature no home grounds can be complete. In the diversity of their foliage and bloom the possibilities of a shrub planting are practically unlimited.

They offer a constant change of scene that is particularly pleasing. By attention to the period of flowering a succession of varing bloom can be had from early Spring until late Autumn. In addition, the glorious autumn shades of foliage and brilliant berries of many varieties is strikingly beautiful.

"Will Grow" Shrubs are big, sturdy, well-rooted plants with a bushy top of numerous branches. They have been nurtured long enough in our nurseries to gain size and vigor, so that they will prove particularly effective, dependable and desirable.

Barberry and Privet—Leading Hedge Plants

When planning a Hedge to enjoy its picturesque effect instead of the unsightliness of the ordinary artificial fence, one naturally thinks of Barberry or California Privet.

Estimate 18 inches as the distance between plants for a Barberry hedge, 6 inches for California Privet,

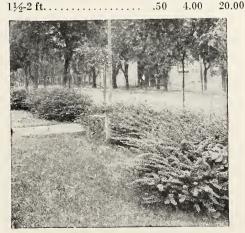

the latter to be cut to within 6 inches of the ground immediately after planting.

The varieties of Barberry and Privet listed below can be used to advantage planted in groups and as specimens as well as for Hedges.

Berberis thunbergi. Japanese Barberry. Each 100 \$1.75 \$12.50 \$0.25 .35 12-18 in... 2.50 18.00

15-18 in. pot grown.....\$2.00

or pink flowers in immense clusters.

A hedge of Japanese Barberry, with its brilliant foliage and bright red berries, is one of the most enjoyable sights imaginable in the Fall. Also popularly used in Foundation and Lawn Planting to very good effect.

Berberis thunbergi atropurpurea. Red-Leaved Jap-anese Barberry. Foliage a rich bronze-red spring to autumn; same habit as Japanese Barberry, but should be given a sunny situation.

B. F. BARR NURSERIES, LANCASTER, PA.

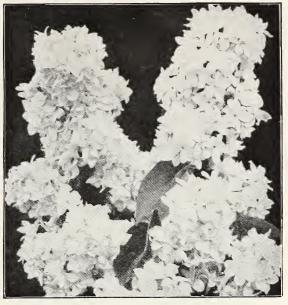

Cut the tops back about one-half or one-third before planting. Be careful to have roots exposed to air or sun as little as possible at any time.

The important point in planting is to have the hole large enough to accommodate the roots without crowding, and to get the soil well worked in among the roots. Space the larger growing Shrubs 4-5 ft. apart, medium growers, 3-4 ft., low growers, 2-3 ft.

Always water abundantly and apply a mulch to preserve the moisture.

SPIRAEA alba (paniculata) - MEADOW SPIREA.

The Weigela is always an old garden favorite with good foliage and flowers in abundance.

Strong Growing, Profuse Blooming Roses

Barr's "Will Grow" 2-year hardy Roses are budded or grafted plants, conceded by rose experts to be stronger growing and more profuse bloomers than own root plants. For permanence and hardiness they are not excelled. If planted deep—placing the graft beneath the surface of the ground—there is no chance for wild shoots.

When desired for very early planting we furnish strong, field-grown 2 yr. plants that have not been subjected to potting and come to you in their dormant stage. Later, the same size plants potted in $5\frac{1}{2}$ and 6 inch pots during January, with active root action and growth started, are supplied. Plants treated this way will be ready to set out beginning May 1st. They will not suffer where very late transplanting is necessary, and begin blooming at once.

You can depend on us, therefore, to fill orders only with plants of the kind best adapted for transplanting at the time shipment is made. Order extremely early or late in the season and we will provide you with the correctly-prepared plants for your use.

HYBRID TEA ROSES

(Monthly Blooming, 2 yr. size)

Hybrid Teas are the most popular of the Roses, being valued for both cutting and bedding.

Betty Uprichard. Carmine buds opening to salmon shade. Fine, long petals holding color in all sorts of weather.

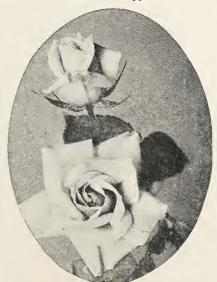

Chateau de Chas. Vougert. Brilliant scarlet, changing to dark velvety crimson; fragrant; double; profuse.

Columbia. Bright pink, deepening as it opens; fragrant, large flowers.

Duchess of Wellington. One of the very best yellow roses, its golden-orange buds opening to flowers of great size, saffron-colored; fragrant.

Edel. White, faintly shaded ivory at base; superb large flower.

Eldorado. Yellow, shaded copper.

The Columbia Rose is one of the most popular of the Hybrid Teas. Of vigorous habit and exceptionally free-blooming.

Etoile de Hollande. Considered best red variety, with brilliant scarlet, fragrant flowers of large size. Easy growing. Flowers larger and darker red in the fall.

Feu Joseph Looymans. Brilliant orange-buff, with vivid apricot tints, even attractive when several days old.

Francis Scott Key. Rich crimson-red; very large double flowers; free bloomer on long stems; good lasting qualities.

Frank Dunlop. Brilliant deep rose-pink, very double and fragrant.

General-Superior Arnold Janssen. Deep carmine-red; large, full and fragrant.

Grande Duchesse Marie-Adelaide. Copperyellow becoming deeper shade at base of petals; pointed buds; low, horizontal growth.

H. V. Machin. Intense rich scarlet crimson; large flowers on strong stems.

Independence Day. Flaming yellow buds, shaded copper and brown, opening to light orange-pink.

Jonkheer J. L. Mock. Petals silvery, rosewhite inside, carmine-pink outside; dependable; large; fragrant.

Kaiserin Auguste Viktoria. Creamy-white, large blooms on long stems; fragrant.

Killarney. Large, long pointed buds, opening to large full blooms of a beautiful flesh color.

Killarney Brilliant. Brilliant pink, almost crimson; large blooms.

Lady Alice Stanley. Broad, pale flesh petals, reverse side deep coral-rose. Large; fragrant, dependable.

Los Angeles. Luminous flame-pink, toned coral, shaded translucent gold at base; fragrant.

Miss Lolita Armour. Chrome yellow near the base, inside and out; with orange, copper and salmon shadings; large, double, fragrant flowers.

Mme. Alexander Dreux. Lovely shade of orange-yellow.

Mme. Butterfly. Bright pink, suffused with apricot and gold; deliciously fragrant.

The White Killarney Rose—one of the really good, pure white garden roses. A white sport of the original Killarney.

Mme. Edouard Herriot. Coral red, shaded with yellow and bright rosy-scarlet; bright greenglossy foliage.

Mme. Leon Pain. Silvery flesh color, with orangeyellow center; large, well-formed, sweet-scented; on long strong stems; vigorous, free and continuous bloomer.

Mrs. Aaron Ward. Indian-yellow, shading to lemon cream; deep golden heart; fragrant.

Mrs. Henry Bowles. Clear pink of especially good form; vigorous, free bloomer; fragrant.

Brilliant salmon-flesh, shaded rose; heart of glowing peach-pink and orange.

Showy, intense-scarlet, slightly yellow at base of petals; exceptionally free blooming; makes extremely effective bedding rose.

Radianee. Beautiful, light silvery-pink to salmon pink. Most dependable pink; large and fragrant.

Red Radiance. Beautiful deep-red form of the Radiance.

Rev. F. Page-Roberts. Long, pointed buds of coppery-red, opening to golden-yellow of remarkable beauty; full, double, fragrant flower. One of the most popular recent introductions. \$1.50 ea.

Rose Marie. Clear rose-pink, fragrant flowers of large size, borne freely; makes vigorous growth.

Souvenir de Claudius Pernet. Beautiful, pure sunflower-yellow, deeper in center; an extraordinary yellow rose.

Souvenir de George Beckwith. Salmon-pink, tinted chrome yellow; immense double fragrant flowers; heavy blooming.

Souvenir de Georges Pernet. Brick red buds, opening to terra-cotta pink.

Talisman. Brilliant orange-red buds, opening a glowing golden yellow, tinted copper red and orange-rose; truly a gorgeous rose; large and fragrant. \$2.00 ea.

White Killarney. Pure white flowers, borne in great abundance.

William F. Dreer. Soft, silvery shell-pink at the base, shading to a rich yellow that seems to pervade the whole of the large double flowers; profuse bloomer; few thorns.

Willowmere. Long-pointed coral red buds, developing into large flowers of a rich shrimppink, shaded yellow in the center.

PRICES. Any of the foregoing Monthly Blooming Roses in strong 2-yr. field-grown plants, \$1.00 ea. (except where noted), or 90c. ea. in quantities of 5 or more plants of your selection.

QUALITY OF PLANTS SUPPLIED

Barr's 2-yr. Roses are No. 1 grade, stocky, dependable plants with vigor to grow. Do not confuse these with cheap 2-yr. plants commonly supplied in Nos. 2 and 3 grades at a lower price, with results to correspond.

Rugosa, or Shrub Roses

Shrubby, ornamental plants growing 5 to 8 ft. high, flowering abundantly in June and recurrently until fall. Extremely hardy. Valuable for hedges or shrubberies.

Agnes. Only rugosa rose which is really yellow, the coppery-yellow buds becoming amber-gold on opening; sweetly fragrant. \$2.50 ea.

Hugonis. Light yellow flowers, 1½-2½ in. across, making striking effect borne on the slender branches in the early spring. \$1.35 ea.

Rugosa (Japanese Rose). Large, white or red flowers followed by handsome scarlet-crimson 75c. ea. fruits.

Rugosa hybrida (Grootendorst Japanese Rose). Bright crimson flowers early spring to frost. \$1.50 ea.

CULTURE OF ROSES

While roses delight in a sunny exposure, a location giving some shade during the heat of the day will be ideal. Any ordinary soil, fertilized with well-rotted stable manure or bone meal, is adapted to Rose growing, providing there is good drainage, as Roses object to wet feet. The soil should be made friable to a depth of eighteen inches.

Set the Hybrid Teas eighteen inches and Hybrid Perpetuals two feet apart, planting an inch deeper than they originally stood. The soil immediately about the roots should be compact. A top dressing of bone meal or well-rolled manure twice a month during the growing season will improve both flowers and fragrance.

Some pruning of the Hybrid Teas during the Summer is useful to encourage growth and flowers. The stronger branches that have flowered may be cut back one half or more. With the Hybrid Perpetuals all vigorous branches should be cut back one half after the June bloom to produce new shoots for Fall flowering.

Insects can be combatted by very forceful sprays of clear water, morning and evening; mildew, by sulphur dusting or spraying; black leaf-spot, by spraying with bordeaux mixture at intervals of ten days.

HARDY CLIMBING ROSES

Useful for covering porches, trellises, arbors, fences, walls and banks. Prune only after flowering.

American Pillar. Immense clusters of single, bright-crimson flowers, with clear white eye.

Aviateur Bleriot. Double flowers of a light saffron-vellow.

Breeze Hill. Clusters of large, white flowers, with yellow, rose and apricot shadings; blooms later than most climbers. \$1.00 ea.

Climbing American Beauty. Rich carmin flowers, 3-4 inches across, in great abundance. Rich carmine

Dr. W. Van Fleet. Best climbing rose. Long-pointed deep pink buds, opening a lighter shade of pink; large and fragrant.

Emily Gray. Long pointed, slender, golden-yellow buds opening to deliciously fragrant, buff-colored flowers; one to ten blooms to a truss.

Gardenia (Hardy Marechal Niel). Golden-yellow buds changing to creamy-white; glossy, deep green foliage.

Mme. Gregoire Staechelin. Long-pointed crimson buds, showing iridescent pearl-pink inside as they open; richly perfumed. The exquisite, full, fragrant blooms last over a long period, coming in succession. \$2.50 ea.

Paul Noel. Double flowers of old-rose blended with salmon-yellow, borne in trusses of 4 to 6; free flowering.

Paul's Scarlet Climber. Vivid scarlet, shaded crimson; semi-double flowers in clusters, borne in profusion.

Prof. C. S. Sargent. Yellow buds and large, double flowers with deeper center; can be used as trailing plant.

Silver Moon. Large, semi-double, silvery-white and creamy flowers in great profusion; rich darkgreen foliage.

Star of Persia. Bright yellow flowers about 3 in. across, semi-double, in big, loose sprays lasting several weeks.

Wichuriana (The Memorial Rose). Beautiful, fragrant, pure white flowers, borne in great profusion; true trailing plant; half evergreen, dark green, glossy foliage.

PRICE. Any of the above (except where noted) in strong 2-yr. Field-Grown Roses 75c. each; or 65c. each in quantities of 5 or more of your selection.

POLYANTHA or "BABY" ROSES

Constant abundance of clusters of small, perfectly formed flowers. They make ideal bedding plants, their heights seldom exceeding 15-20 in.

Cecil Brunner (Sweetheart). Bright rose with yellowish centers, fragrant double flowers.

Chatillon Rose. Bright pink, touched with orange; semi-double blooms in large trusses.

Gruss an Aachen. Large, very double flowers, resembling Hybrid Teas; delicate flesh-pink, overlaid with yellow, shading deeper in the center; continually in bloom.

Lady Reading. Bright red flowers in large clusters, faintly perfumed; very prolific.

PRICE. Any of the above in strong 2-yr. Field-Grown Roses 75c. each; or 65c. each in quantities of 5 or more of your selection.

The Paul's Scarlet Climber in bloom is a picture of vivid color.

HYBRID PERPETUAL ROSES

Larger, fuller, more hardy and more fragrant than other Roses; a wonderful display in June, and often blooming in late Summer or early Fall.

Frau Karl Druschki. Immense, pure white,

perfectly double flowers. General Jacqueminot. Brilliant scarlet-crimson; fragrant, perfect flowers.

Mrs. John Laing. Beautiful soft pink; lowgrowing, profuse bloomer.

Paul Neyron. Largest of all Roses, some 6 inches in diameter; fragrant, clear pink; strong grower. Soleil d'Or. Gorgeously colored orange-gold and pink; very double and sweetly scented.

Ulrich Brunner. Brilliant cherry-red; large and fragrant.

York and Lancaster. Pale red and white flowers sometimes striped with pink; semi-double; fragrant. Of Damask type, this is a famous old Rose, romance connecting it with the War of the

PRICE. Any of the above in strong 2-yr. Field-Grown Roses \$1.00 each; or 90c. each in quantities of 5 or more of your selection.

(MONTHLY BLOOMING VARIETIES)

-Mme. Butterfly. Pink-yellow.

Radiance. Silvery-pink. 2—Red Radiance. Cerise-red.

2—Chateau de Chas. Vougert. Scarlet. 2—White Killarney. Pure white.

All big 2-yr. plants guaranteed to bloom first summer. Too large for parcel post.

In the above illustration is shown the Festiva Maxima Peony, one of the very best and most dependable of the white-flowering varieties.

Rich in color, attractive in form, and beautiful in foliage the Peony very appropriately has been called "King of Spring Flowers." Equaling in beauty, coloring and delicacy the finest roses, many of the fragrant varieties have the true rose odor.

Peonies are remarkably easy to grow, perfectly hardy, free from the many diseases and insects that attack so many plants, and will bloom year after year without renewal, if the soil is well prepared and fertile. Strong roots give some bloom the first year, but full and perfect blooms should not be expected before the second or third year.

Peonies can be planted in every conceivable place—as single specimens, in large or small beds, against shrubs or in long rows bordering walks and drives. Grandest effects are always produced by mass plantings.

The Peonies we list are all our own growing, are true to name, and have been tried out in our nurseries at least three years. We supply only good, vigorous roots with strong eyes, which insures power to grow.

PEONY CULTURE

An abundance of plant food and moisture are essential to success with Peonies as they are strong growers and produce many enormous flowers. As the plants grow and bloom top dress with bone meal between, but not on, the plants. Plant 3½-4ft, apart and cover the crown bud under two or three inches of soil. We advise August, September and October planting, although planting can also be done in the early Spring. Mulch in the Fall.

WHITE

I. EARLY.

Duc de Wellington. Very large, well formed sul-phur-white bloom; ideal habit; strong grower; very fragrant. 60c. ea.

Duchesse de Nemours. Sulphur-white with greenish reflex, fading to pure white; fine for cut flowers. 50c. ea.

Iris —"The Poor Man's Orchid"

(One of Our Leading Specialties)

Incomparable for its beauty of soft iridescence of color revealed when you look into its heart, the Iris has very appropriately been termed, "The Poor Man's Orchid."

Not partial as to soil or location and will flourish in semi-shade. Does well planted in groups or in borders. In planting avoid fresh manure and plant only deep enough to cover the roots.

FULL BEARDED IRIS—(German Iris)

In description of varieties, "S" refers to "Standards" or three upright petals, and "F" to "Falls" or three drooping petals.

Strong plants out of pots, ready for delivery after May 10

LARGE FLOWERING VARIETIES

Most showy of the late Fall flowers. Should be planted in a protected location in good soil. For larger flowers allow only one bud to a plant.

Betsy Ross. White Japanese incurved of large size and perfect ball shape.

Glen View. Bronze.

McNeiss. Large, early pink; reflexed in form. Richmond. Bright golden yellow. Large; perfect in form and color.

25c. each; \$2.00 per 10 of one variety. Not less than five of one name at 10 rate.

HARDY POMPON VARIETIES

Easily-grown plants, known to many persons as "Winter-shrubs." Extremely graceful and beautiful sprays of bloom of every conceivable form and shade of color. The varieties listed below will bloom before freezing weather.

Anna L. Moran. Brilliant flame scarlet; double. Bronze Buckingham. Glowing bronze; single. Buckingham. Old rose; single type. Fairy Queen. Shell pink. Firelight. Bright red; aster type. Golden Climax. Rich golden yellow; single. Julie Lagravere. Garnet; large; aster type. Keystone. Rosy-pink; one of the best. L'Argentuillais. Chestnut; decorative type. Lillian Doty. Large incurved pink; aster type.

Lillian Doty Pompon Chrysanthemums
Mrs. Albert Phillips. Deep lavender; single.
New York. Orange and wall-flower color.
Source D'Or. Deep reddish-brown; double.
Tints of Gold. Very attractive golden bronze.
White Lillian Doty. Large incurved white.

25c. each; \$2.00 per 10 of one variety. Not less than five of one name at 10 rates.

Lilies—The Aristocrats Among Flowers

Established Fall-Potted Plants

Madonna Lily

In Lilies the best results, both as to growth and effect, are secured by planting among low shrubs or in the perennial border. While profiting by partial shade they should never be planted near or under trees. Good winter protection should be provided.

Lilium auratum—GOLDBAND LILY. Large, ivory-white, fragrant flowers with distinct central band of bright yellow and numerous deep purple spots; 15–18 flowers on a stem; July and August. 50c. each.

L. candidum—MADONNA LILY. Pure white, fragrant flowers on long stems in June and July. 3-4 ft. Plant only in August and September. 40c. each.

L. regale—REGAL LILY. Fragrant, trumpetshaped flowers, ivory-white, shaded pink, tinged canary-yellow at base. Blooms freely in July. 50c. each.

L. speciosum magnificum (rubrum) — GREAT SPECIOSUM LILY. Rich, ruby-carmineflowers, 6-8 in. across, ten to fifteen on a plant; August and September. 50c. each.

L. ligrinum splendens—GIANT TIGER LILY. Immense spikes of orange-scarlet flowers, spotted black, sometimes twenty-five to a stem. Very showy. 25c. each.

A house is not a home until it has been planted.

Barr's Selection of Best Phlox

For all-round reliability no other garden flower can excel the Phlox, which embodies all the qualities desirable in a plant—hardiness, upright carriage, pretty foliage, fragrance, beauty and variety of color, immunity from disease.

Fortunately these gorgeous plants have a diversity of valuable use, being attractive as single specimens, in small groups or large beds, or when massed against a background of Shrubs. They are also ideal for cut flowers.

Then, too, they come at a time when there are few other flowers to be depended upon. If the first buds are removed in early summer a succession of bloom can be enjoyed until late Fall. Give plenty of water in dry weather.

Bacchante. Tryian rose; crimson-carmine eye; medium. 25c. each; \$2.00 per 10.

B. Comte. Rich satiny amaranth; medium; late. 25c. each; \$2.00 per 10.

Baron von Dedem. Brilliant scarlet-red with salmon shading; very showy; midseason; medium. 30c. each; \$2.50 per 10.

Elizabeth Campbell. Salmon-pink, dark crimson eye; medium height: mid-season; large trusses. 30c. each; \$2.50 per 10.

ernand Cortez. Deep crimson with much darker center; tall. 30c. each; \$2.50 per 10. Fernand Cortez.

Fuerbrand. Brilliant orange scarlet; medium; blooms very freely. 30c. each; \$2.50 per 10.

Isabey. Salmon-pink; medium; midseason. 25c. each; \$2.00 per 10.

Jeanne d'Arc. Pure white; large flowering; late; tall. 25c. each; \$2.00 per 10.

Jules Sandeau. Brilliant water-melon *pink; dwarf; long flowering period. 30c. each; \$2.50

Miss Lingard. Fine white, with pink eye; free bloomer; early; medium. 25c. each; \$2.00 per 10.

Mrs. Charles Dorr. Beautiful shade of lavender; large, conical heads; tall. 25c. each; \$2.00 per 10.

Mrs. Jenkins (Independence). Immense, compact heads of pure white flowers; midseason; tall. 25c. each; \$2.00 per 10.

R. P. Struthers. Bright rosy-carmine with claret eye; midseason; tall. 25c. each; \$2.00 per 10.

Rheinlander. Beautiful apricot pink; immense trusses of large flowers; early; medium. 25c. each. \$2.00 per 10.

Richard Wallace. Pure white with violet-red eye; midseason; tall. 30c. each; \$2.50 per 10.

Rijnstroom. Carmine-rose; immense trusses; midseason; tall. 25c. each; \$2.00 per 10.

Sir Edwin Landseer. Bright crimson; large trusses; vigorous growing. 25c. each; \$2.00 per

18 CHOICEST PHLOX \$3.50 POSTPAID

(Note the wonderful assortment in this special offer)

- 3 Bacchante. Rose, with carmine eye.
- 3 Isabey. Bright salmon-pink.
 3 Miss Lingard. White with pink eye.
 - 3 Mrs. Charles Dorr. Lavender. 3 Rijnstroom. Carmine-rose.
- 3 Sir Edwin Landseer. Bright crimson.

3 each of any 3 varieties. \$2.00 Postpaid

Thor. Deep apricot-pink, suffused and overlaid with a scarlet glow; white halo surrounds the red eye; dwarf; early. 25c. each; \$2.00 per 10.

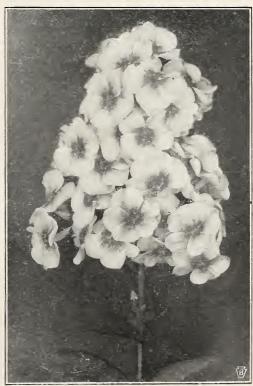

Widar. Light, reddish violet; large white center. 25c. each; \$2.00 per 10.

Phlox Subulata — DWARF PHLOX

Attractive Ground Cover, or Rock Garden Plant. Blooms very early in the Spring, the flowers appearing in hundreds of small clusters. Useful as edging for borders, in cemeteries, on terraces, between stepping stones, etc. Withstands drought. Spreading habit.

P. Subulata alba—WHITE MOSS. Pure white. P. Subulata lilacina-LILAC MOSS. Pale lilac. P. Subulata rosea-ROSE MOSS. Pretty pink.

Prices of Dwarf Phlox: 25c. each; \$2.00 per 10.

The Phlox is one of the best all around garden plants, and should be generously planted.

From early Spring to late Autumn there are always flowers to enjoy where Perennials are planted in groups of 3 or more in beds or borders. Once planted they continue to bloom and increase in beauty each succeeding year. Avoid planting only one of a kind owing to the bizarre effect it produces—always 3 or more of a kind.

Perennials require little attention (weeding and watering during the growing season and mulching with fertilizer in the Fall) and, as each variety has a fixed period to flower, a succession of bloom can be enjoyed throughout the season. The following table makes easythe selection of proper varieties.

How to Plant and Care for Perennials

The secret of success with Perennials is an enriched soil together with good cultivation and careful watering.

Groups of three or more of a variety will produce the best effect in a border, using the taller growing varieties as a background. If planting near Shrubs which will rob the Perennials of plant nourishment, keep 3 ft. away from Shrubs.

Plant in Spring or early Fall, providing Winter protection for Fall plantings, especially Anemones, Campanula, Digitalis, Hollyhocks, Chrysanthemums, Stokesia and Tritoma. For best results transplant every few years to increase number and produce more abundant bloom.

The soil should be dug to a depth of at least 12 to 18 inches into which has been worked two inches of well-rotted stable manure. Some other good fertilizer can be used if stable manure is unobtainable, but stable manure is to be preferred.

At the beginning of freezing weather apply a mulch of cut tobacco stems, strawy manure, leaves or other light material to prevent alternate freezing and thawing of the soil, which may cause damage.

24 DELPHINIUMS or LARKSPURS, \$3.75 Postpaid

The Delphinium, or Perennial Larkspur, is one of the finest blue flowers cultivated, and among the most useful and effective of hardy plants Especially fine for the hardy border, although very effective almost anywhere—in beds, in clumps, in the shrubbery. Ideal for cut flowers.

Plant in well-enriched soil and cut off the old flowering stems as they mature.

Three of the Best Varieties are Included in this Offer as Follows: 12 Delphinium belladonna, beautiful sky-blue; flowers all summer until cut down by frost. 6 Delphinium hybrids, large flowers on long spikes, in mixed shades of blue. 6 Delphinium bellamosa, large flowers of a rich deep blue shade.

24 Vigorous "Will Grow" Delphinium Plants Only \$3.75 Postpaid

One-Half above numbers (12 plants) only \$2.00 postpaid.

Eulalia — ORNAMENTAL HARDY GRASSES

Eulalias are remarkably hardy, and universal favorites for bedding. Interspersed in the shrubbery or perennial border, they are at home.

Beautiful effect produced by edging lawn with Ornamental Hardy Grasses.

Very effective results can be secured from the hardy grasses, coming as they do, in all forms and kinds of foliage.

Eulalia Japonica. 6 to 8 ft. Rich, green foliage which waves with the slightest breeze.

- E. Japonica gracillima univittata. 5 to 7 ft. Narrow-leaved variety of the one above, very graceful and pleasing.
- E. Japonica variegata. 4 to 5 ft. Striped with white variegation, forming an attractive plant when grouped with the green.
- E. Japonica zebrina. 5 to 7 ft. Barred with bronze-yellow, and very popular, due to the bizarre effect produced.

Prices on all Grasses: Root-clumps, 6 inch diameter, 35 cts. each; extra heavy clumps, 75 cts. cach.

SUMMER AND AUTUMN FLOWERING BULBS

Some of the showiest flowering plants of the easiest possible culture comprise the Summer and Autumn-Flowering Bulbs. They prefer a sunny position and should only be planted after all danger of frost is over. This class includes such favorites as Gladioli, Dahlias, Cannas, Caladium and Tuberose.

Plants of the correct age or bulbs of the proper size are requisite for best results and you can depend on us to furnish this kind.

BARR'S SELECT DAHLIAS

Out of the hundreds of varieties, many of which even an expert cannot distinguish apart, we have selected a number of the very best, and will furnish these in strong roots absolutely true to name.

Culture of Dahlias

Select a well drained position where the plants will receive the benefit of the sun the greater part of the day. Dahlias flourish best in a deep, loose, moist soil, and on sandy soil if plant food and moisture are furnished.

furnished.

Plant three feet apart, in rows, setting dormant roots out May 1 to 25, covering 3 inches deep. Started plants should not be set out until all danger of frost is over. After the plant has made two or three joints pinch out the center to make a bushy plant that will bear large blooms.

After the first heavy frost, lift the roots and dry them in the sun; then shake off the dirt, trim off tops and broken parts and store in dry, cool cellar, same as potatoes.

CACTUS DAHLIAS

The Cactus type strongly resembles the Chrysanthemum, having long, narrow, pointed florets. Countess of Lonsdale. Pleasing blending of salmon-pink and amber. 35c. each.

Esther R. Holmes. Pleasing mauve-pink; fine cut flower. 50c.each.

George Walters. Rich, coppery old gold, buff at

center. 50c. each. U. S. A. Rich crange; large size; good bloomer. \$1.00 each.

SINGLE DAHLIAS

These have one circle of ray flowers surrounding the disk, and resemble the Cosmos although larger. Crimson Century. Rich, velvety crimson. 35c. ea.

DECORATIVE DAHLIAS

The Decorative-type is always full to the center and inclined to be flat or massive.

Insulinde. Rich, saffron yellow, shaded russet orange. Extra good. 75c. each.

Jersey's Beauty. Fine, large rose-pink. 75c. each. Patrick O'Mara. Soft orange buff, slightly tinged rose. 50c. each.

PEONY-FLOWERED DAHLIAS

So named owing to their resemblance to semidouble Peonies.

Mrs. Charles L. Seybold. White, suffused pink; heavily tipped carmine. 35c. each.

POMPON DAHLIAS

A small form of the show type. Especially desirable for cut flowers.

Klein Domitea. Bright, golden terra cotta. 35c. each.

Snow Clad. Pure white. 50c. each.

Barr's Mixture Dahlias

A wonderful mixture containing leading types and colors. \$2.00 per doz.; \$15.00 per 100.

Cactus Dahlias (Fine for cut flowers)

CANNAS

Cannas are unexcelled for their gorgeous display of color lasting from planting time until frost. Planted in group masses they make a brilliant show. Water liberally throughout the summer.

Strong, started plants, 5 to 8 in. high, out of 4 in. pots.

Apricot (4 ft.) Rich apricot shade, gold and coral center. 25c. each; \$2.50 per doz.
King Humbert. (4½ ft.) Best bronze-leaved

variety. Flowers orange-scarlet, flecked with carmine. 25c. each; \$2.50 per doz.

Mrs. Alfred F. Conard. (3½ ft.) Silvered peach-

pink. 35c. each; \$3.50 per doz. Richard Wallace. (5 ft.) Canary yellow. 25c. each; \$2.50 per doz.

The President. (4 ft.) Rich, glowing scarlet flowers of immense size. 25c. each; \$2.50 per doz.

CALADIUM (Elephant's Ear)

Immense light green leaves producing tropical effect. Large bulbs, 30c. each, postpaid.

TUBEROSE

Long spikes of white, waxy, delightfully fragrant flowers on a stem 2 to 3 ft. high. Strong fresh bulbs, 10c. each; 75c. per doz., postpaid.

Gladioli-Most Popular Summer Bulbous Plants

Because of their graceful flower spikes, exceedingly beautiful in form and color, Gladioli have become the most popular of the Summer and Fall-blooming bulbous plants.

They show, too, splendid effect in group and mass planting or in the perennial border, and as cut flowers are particularly desirable for growing in the home garden. Cut just as the lower flower opens, keep in fresh water and the remaining buds will open. Remove the open flowers as they fade and the blooming spike can be kept fresh for a week.

Only Blooming-size Bulbs will be supplied.

Assorted Gladioli

Baron Hulot. Dark, violet-blue; flowers large. \$10.00 per 100; \$1.50 per doz.

Fackler's Early Pink. Earliest variety to bloom. \$7.50 per 100; \$1.00 per doz.

Halley. Delicate salmon-pink with slight roseate tinge, early blooming; large. \$4.75 per 100; 75c. per doz.

Le Marechal Foch. Soft flesh-pink; straight, well-filled spikes of large flowers; early. \$6.00 per 100; \$1.00 per doz.

Lucette. White, with backs of petals showing trace of pink. \$6.50 per 100; \$1.00 per doz.

Mrs. Dr. Norton. La France pink shading to a very pale pink throat. Lower petals have creamy bases with carmine pencilings. \$7.50 per 100; \$1.00 per doz.

Mrs. E. J. Shaylor. Beautiful deep rose pink; slightly ruffled. Prize winning variety. \$6.50 per 100; \$1.00 per doz.

Gladiolus Culture

Gladioli prefer a light loam or sandy soil, and an open, sunny situation. No fresh manure should be added to the soil the year in which they are grown; if possible this should be done the preceding Fall.

Planting can be started in April, and every 10 days thereafter until July 1 for a succession of bloom. Late plantings will afford fine late flowers. Cover with three to four inches of soil. If the soil is heavy, plant at less depth. The plants may stand as close as six inches from each other.

After frosts, but before freezing weather, dig up the plants and dry in sun and air for a few hours before storing in a cool, dry, dark place. The tops should be left on until completely shriveled.

Mrs. Francis King. Light scarlet of pleasing shade; effective both in the border or when cut. \$6.00 per 100; \$1.00 per doz.

Mrs. Frank Pendleton. Lovely flushed salmonpink, with brilliant carmine, or deep blood-red blotches in the throat. Exquisite. \$6.50 per 100; \$1.00 per doz.

Niagara. Cream shade, blending to canary-yellow. Throat splashed with carmine. Large open flowers, one of the best for color, texture and keeping qualities. \$7.50 per 100; \$1.00 per doz.

Panama. Mauve-rose, large wide-open flowers wax like. Finest of the pink shaded Gladioli. \$5.00 per 100; 75c. per doz.

Peace. White, with pale-lilac feathering on interior petals. Flowers large and well formed. \$6.00 per 100; \$1.00 per doz.

Primulinus Hybrids. New race of remarkable beauty and daintiness; all shades of color, orange and gold predominates. \$3.00 per 100; 50c. per doz.

Schwaben. Pure canary-yellow, shading to soft yellow, with purple tinge on lower petals. Largest and strongest yellow. \$6.50 per 100; \$1.00 per doz.

Virginia (Scarlet Princeps). Flaming scarlet; large, massive flowers, many open at a time. \$6.50 per 100; \$1.00 per doz.

Wilbrink. Soft lavender pink, with soft yellow blotch on lower petals. \$6.50 per 100; \$1.00 per doz.

Standard Gladioli Mixture

Includes mixed colors and types. This mixture will give general satisfaction.

All blooming-size bulbs, \$35.00 per 1000; \$4.50 per 100; 60c. per doz.

Summer Annuals for Quick Results

These are easily grown, give quick results and include some of the most showy garden flowers. They offer great variety of colors, form and foliage. Frequently used to fill bare spots in the Hardy Border and to supplement the Rock Garden. Most of the bedding types will furnish an abundance of cut flowers for the house.

(Ready to plant out about May 10).

Varieties marked (b) are especially adapted to bedding purposes; (e) for edging; (p) for porch boxes; (r) for rock gardens; (v) vines.

Achyranthes. (b) (e) Red leaved variety. 2½ in. pots, \$1.25 per doz.; \$8.00 per 100.

Agertum. (b) (e) (p) (r) Bright blue. 3 in. pots, \$1.25 per doz.

Alternanthera. (e) Dainty foliage; yellow touched green, or red and green. 2½ in. pots. \$1.10 per doz.; \$8.00 per 100.

Alyssum, Sweet. (e) (p) (r) Dainty, white flowers, 21% in. pots, \$1.25 per doz.; \$8.00 per 100.

Antirrhinum (Snapdragons). (b) Pink, copper, red, yellow. 3 in. pots. \$1.25 per doz.; \$8.00 per 100.

Asters. (b) White, rose, purple; early or late. 35c. per doz.; \$2.50 per 100.

Begonias. (b) (p) Pink or deep rose. 3 in. pots, 20c. each; \$2.00 per doz.

Calendula. Orange King. (Pot Marigold) (b) 35c. per doz.; \$2.50 per 100.

Coleus. (b) (e) (p) Separate or mixed colors, 2½ in. pots. \$1.00 per doz.: \$7.00 per 100.

Cosmos. (b) Lavender, white and pink mixed; early. 35c. per doz.: \$2.50 per 100.

Fuchsias (p) For shady spots. 4-inch pots, 25c. each; \$2.50 per doz.

GERANIUMS (b) (p)

Marquis de Montmort. Purplish-red. Poitevine. Salmon pink. Radio Red. Dark red. Ricard. Bright red.

3 in. pots, 15c. each; \$1.50 per doz.; \$10.00 per 100. 4 in. pots, 25c. each; \$2.50 per doz.; \$20.00 per 100.

Heliotrope (b) (r) Small, fragrant, blue flowers in clusters. 4-inch pots, 25c. each; \$2.50 per doz.

Ivy German. (p) (v) (r) Fast-growing; good for baskets. 2½-inch pots, 15c. each; \$1.50 per doz.

Lantana. (e) (p) (r) Mixed colors. 3 in. pots, 20c. each; \$2.00 per doz.; 4 in. pots., 25c. each; \$2.50 per doz.

Lantana, Trailing. (p) (v) (r) 2½-inch pots, 15c. each; \$1.50 per doz.

Marigold. El Dorado. (e) Large double flowers in all shades of yellow. 35c. per doz.

Marigold. (e) Legion of Honor. Dwarf, single. 35c. per doz.; \$2.50 per 100.

Moonflower Vine [Ipomoea Maxima] (v) Pure white flowers. 4-inch pots, 25c. each; \$2.50 per doz.

Pansies, Mixed. (b) (e) (r) 75c. per doz.; \$5.00 per 100.

Geraniums, Petunias, Ageratum, Sweet Alyssum, Vincas, etc., will make up an attractive Window-Box; English Ivies, listed under Vines, should not be overlooked, either.

PETUNIAS (b) (p) (r)

Diener's Ruffled Monsters. Flowers ruffled and fringed: wide range of colors.

Diener's Pink Glory. Cheerful shade of rose pink.

Crotons, Dracaenas, Ferns, Palms, Pandanus, Sandsevieria quoted on application.

Plan to Plant Some Fruit Trees

The trees listed here are the best in their respective varieties. They are the largest sizes that can be planted to best advantage, are straight trunked, true to name, and by reason of their unusual vigor will transplant successfully, make good growth, and give an abundant yield.

STANDARD APPLE

Baldwin. Large, bright red, rich, juicy. Winter. Bellflower. Yellow, crisp, large and juicy. Winter. Delicious. Large, unevenly shaped. Winter. Early Harvest. Small. Straw color. Acid. Early. Fall Pippin. Large. Yellowish green. Delicious.

Autumn. Grimes' Golden Pippin. Medium. Sub-acid.

Winter. Gravenstein. Large. Yellow, striped red. Sub-

acid. Early.

McIntosh. Medium to large, deep red. Winter. Rambo. Large, yellow; rich and of good flavor. Early.

Red Astrachan. Large, crimson. Juicy, acid. Early. Smokehouse. Medium, red striped, Sub-acid.

Stayman's Winesap. Medium, bright red. Winter. Yellow Transparent. Pale yellow. Sub-acid. Early.

York İmperial. Medium, white, shaded red. Subacid. Winter.

2 yr., 5 to 6 ft., 75c. ea.; \$7 per 10 of one variety; \$50.00 per 100.

CRAB-APPLE

Transcendent. Medium, golden yellow, crimson cheek. September. Strong, stocky trees. \$1.00 ea.; \$9 per 10 of one variety.

APRICOT

Early Golden. Small, pale orange. Juicy and sweet. Moorpark. Large, deep orange. Rich. August. 2 yr., 4-5 ft., \$1.10 ea.; \$10 per 10.

SOUR CHERRY

Early Richmond. Medium, deep red, rich, acid. Middle of June.

English Morello. Large deep red, pleasant, acid. Last of July.

Montmorency. Large; bright red; pleasing acid flavor. June.

2 yr., 3 to 5 ft., \$1.25 ea.; \$11.00 per 10 of one variety.

SWEET CHERRY

Black Tartarian. Very large, purplish-black, rich. June.

Governor Wood. Large; yellow, shaded red. June. Napoleon Bigarreau. Large, yellow and red, excellent. July.

Rockport. Large, red, pleasant and rich. June. Schmidt's Bigarreau. Large, red, rich and pleasant. July.

Windsor (Oxheart). Large, liver-color, rich. July. Yellow Spanish. Very large, yellow, red cheek, sweet. Last of June.

2 yr., 5 to 6 ft., \$1.25 ea.; \$11.00 per 10 of one variety.

Basket of Champion Peaches

PEACH

Champion. Very large, white, red cheek, delicious. Late September.

Crawford's Early. Medium, yellow. July.

Crawford's Late. Very large, yellow, red cheek. Late September.

Elberta. Very large, yellow, red cheek, juicy, rich. Middle of August.

Iron Mountain. Large, pure white, solid, juicy. October.

J. H. Hale. Very large, yellow. Late August.

Mountain Rose. Medium, white, red cheek, sweet. First of August.

Stump the World. Very large, creamy white, red cheek, delicious. September.

Yellow St. John. Large, yellow, sweet. July.

1 yr., 4 to 5 ft., 60c. ea.; \$5.00 per 10 of one variety; \$35.00 per 100.

PEAR

Bartlett. Large, clear yellow, highly aromatic. Autumn.

Duchess d'Agnouleme. Large, greenish yellow,

juicy. Autumn.
Kieffer. Large, golden yellow, sweet. Winter.
Seckel. Small, yellowish russet, spicy flavor. Autumn.

2 yr., 4 to 5 ft., \$1.00 ea.; \$9 per 10 of one variety.

"Will Grow" Fruit Trees Are All Too Large For Parcel Post.

PLUM

(European Varieties) German Prune. Large, purple, sweet. September. Reine Claude. Large, green gage, excellent. Late September.

Yellow Egg. Large, oval, yellow, juicy. September. 2 yr., 5 to 6 ft., 85c. ea.; \$8.00 per 10 of one

variety.

(Japanese Varieties) Burbank. Large, cherry-red, sweet. Last of August. 2 yr., 5 to 6 ft., 85c. ea.; \$8.00 per 10 of one variety.

QUINCE

Champion. Prolific, constant bearer; fruit larger and more oval than the Orange variety. Late. Meech. Large and prolific; orange-yellow; delightfully fragrant.

2 yr., 3 to 4 ft., \$1.25 ea.; \$11 per 10 of one variety.

Strong, layer plants, 30c. per 10 of one variety; \$2.00 per 100 of one variety; \$15.00 per 1000.

EVERBEARING STRAWBERRIES

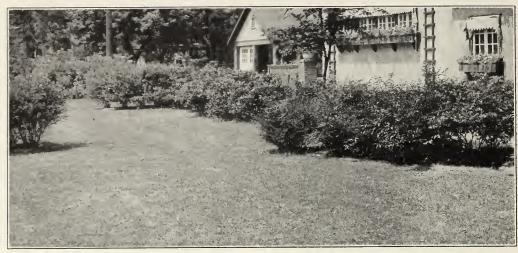

Mastodon. Large fruiting and most prolific, bearing continuously June to frost; good flavor. \$1.25 per 10; \$10.00 per 100.

Progressive. Prolific, deep glossy crimson berries of good taste. 50c. per 10; \$2.50 per 100.

Dish of Wm. Belt Strawberries

Beautiful Lawns in Shade or Sunshine

No element contributes more to attractiveness of the home grounds than a beautiful lawn. It is an essential part of the "grounds beautiful," carpeting the open spaces with an expanse of velvety green.

When making a lawn the proper seed is a most important consideration. By using the right mixture the harmful effect of too much shade can be overcome to some extent. Cheap seed does not pay in any case. For proper germination the ground must be kept moist for three weeks after sowing the seed. Roll the ground to firm the soil about the seed and repeat the rolling after the seed is well started. Avoid light sprinklings of water, as when watering is done it should be done thoroughly.

Barr's "Will Grow" Sunnyside Grass Seed

Combination of the most desirable grasses; fine leaved, good color, lasting qualities. A superior seed, which we can highly recommend over cheaper seeds. Its use is a real saving as considerable work and expense is incurred in lawn making and all may be wasted, if a cheap, poor seed is used.

1 lb. (about 1\frac{1}{3} qt.), 60c.; 5 lbs., \$2.75; 25 lbs., \$12.50; 100 lbs., \$45.00. (Bu. of 20 lbs., \$10.00.)

Barr's Special "Shady Side" Grass Seed

The difficulty of getting grass to grow in shaded places is overcome by using this special mixture. Barr's formula includes some of the scarcer and more expensive varieties of grasses which have proven best adapted for situations of a difficult nature. Contains no timothy or other cheap seed.

1 lb. (about $1\frac{1}{3}$ qt.), 90c.; 5 lbs., \$4.00; 10 lbs., \$7.00.

Tree Tanglefoot. Easily applied, effective, economical and non-injurious protection for fruit, shade and ornamental trees against ants, caterpillars and all crawling One pound is insects. sufficient for 12 to 15 ft. of Also useful for band. waterproofing wounds, cavities, and crotches of trees. 1 lb. can, 60c.; 5 lb. can, \$2.75. Postage extra.

Volck. For all insect pests. ½ pt., 50c.; 1 pt., 75c.; 1 qt., \$1.00.

Fertilizers for Lawn and Garden

Aluminum Sulphate. Useful in creating acid soil conditions for Rhododendrons and similar plants. Broadcast 1 to 3 lb. to each square yard of surface. 10 lbs., 75c.; 25 lbs., \$1.75; 50 lbs., \$3.00; 100 lbs., \$5.00.

Bone Meal (Raw). Safe and effective fertilizer for all purposes; especially good on lawns. One pound will sow 10 sq. ft.; 1 lb., 10c.; 5 lbs., 40c.; 10 lbs., 65c.; 15 lbs., \$1.00; 25 lbs., \$1.50; 50 lbs., \$2.50; 100 lbs., \$4.00.

Leaf Mold. Nature's plant food. Used as a top dressing, or mixed with the soil when making Rhododendron or Azalea beds. 25 lbs., 50c.; 50 lbs., 90c.; 100 lbs., \$1.75; 500 lbs., \$8.50.

Lime, Hydrated. For lawn and field use where the ground has become sour. 10 lbs., 35c.; 50 lbs., \$1.00; 100 lbs., \$1.75.

Peat Moss (Granulated). Applied as mulch conserves moisture, keep down weeds, enriches soil and beautifies at same time. Useful for Rhododendron beds. 1 bale covers 125 sq. ft. to depth of 2 inches. 1 bale, \$4.00; 5 bales, \$17.50. Sheep Manure, Pulverized. A pure natural manure, for lawns, potting soil, general vegetable and flower garden, where quick results are wanted. 5 lbs., 45c.; 10 lbs., 70c.; 25 lbs., \$1.40; 50 lbs., \$2.25; 100 lbs., \$3.75; 500 lbs., \$18.00; 1000 lbs., \$33.00; 1 ton, \$60.00.

Stim-U-Plant. All-the-year fertilizer in tablet form for all kinds of plants; odorless; quick-acting. Can be used in tablet form or dissolved in water. 30 for 25c.; 100 for 75c.; 1000 for \$3.50. Postage extra.

Tobacco Stems, Cut. A combined fertilizer, mulch and insecticide for lawns and shrubbery, trees and evergreens. Unlike stable manure does not introduce weed seeds. 100 lbs. will cover 250 sq. ft. thickly; \$2.50 per 100 lbs., \$30.00 per ton.

goro. Specially prepared plant food. 5 lbs., 50c.; 25 lbs., \$1.75; 50 lbs., \$3.00; 100 lbs., \$5.00.

Good lawn grasses will not succeed in sour soil. Wood ashes correct that. If bone meal has been sown in the land, do not use the Wood-ashes for three or four weeks. One pound will sow 10 sq. ft., $1\frac{1}{2}$ to 2 tons to the acre. 25 lbs., \$1.25; 50 lbs., \$2.00; 100 lbs., \$3.00.

This attractive Mass Planting shows tall-growing Evergreens artistically placed for accent purposes, faced with low-growing Evergreens and Berry-bearing and Flowering Shrubs for variety and interest.

Appealing Beauty and Increased Values Follow Barr's Artistic Landscape Designing

When given a worthy setting of Evergreens and Shrubbery, the well designed, attractively built modern home as well as the old homestead stands forth in increased beauty. It loses its cold severity, seems more inviting and presents a completely finished picture,—and actual valuation is greatly increased.

The Proper Planting Plan Effects a Saving

A studied plan will guard you against disappointment in ultimate effect and prevent losses in plants placed erroneously for successful growth. The plan you need whether it be for a pretentious planting or only a modest one, we will be glad to furnish. Come and talk it over with our Landscape Artists. Or if you prefer, you can submit your problem for solution by mail, which can be done very satisfactorily.

Artistic Landscape Designing Our Specialty

In formulating your plan we take your own ideas as a foundation. The effect you desire is worked out, manner of planting shown, plants required are listed, and estimate of cost given. Every effort is made to give you a plan best adapted to your own conditions and desires, and at a minimum of cost for plants.

Free Service for Large Operations as Well as for Small Plantings

For large operations requiring surveying and much detailed work, we believe clients prefer to pay expense incurred so as not to feel under any obligation to purchase the materials from us. They are billed accordingly although not expected to pay until the plan is satisfactory. Should they decide to use our stock on the operation, which we hope they will do, any payment made for designing plans will be refunded in discount on purchases at current catalog prices to the extent of 10%, providing such discount does not exceed the actual charge for the plan. Under this arrangement the large operator, as well as the small planter, is given the benefit of a free planning service.

A Nearby Representative at Your Service

Our qualified district representatives cover the entire Southeastern Section of Pennsylvania, district headquarters being located at Allentown, Harrisburg, Reading and York, Pennsylvania. If within reach of one of these representatives or our main office in Lancaster you can arrange, should you feel it warranted, for a consultation on your own grounds. We invite you to communicate with us regarding this service.

Be Ready With Adopted Plan When Planting Season Begins

Although ready at all times to give suggestions and advice to prospective planters, we strongly urge that you have all details as to planning disposed of before the planting season begins. Only in this way can you prevent being hurried in your plans by an advancing season and give your planting the justice it deserves.

Early Action Carries With it a Two-Fold Advantage

If you desire a planting plan for this Spring's planting let us get to work for you before the planting season opens. In planting time we are often unable to give the careful study and do the detail work necessary in making planting plans.

By having all details disposed of in advance of planting time you will not only feel satisfied you have the ideal plan, but you will also have the opportunity to gain all the benefits of early planting.

HOW greatly has the Rock Garden increased in popular-ity! Because of its ease of accomplishment and unlimited possi-bilities in transforming uninter-esting spots into pictures of wondrous beauty its permanence is established.

How to Build a Rock Garden

Select a gentle slope. Use the largest boulders possible, placing the bigger stones at the base, the strata all running the same. They should appear naturally placed. A few large rocks rather than many small

naturally placed. A lew large rocks rather than many small ones is preferable.

In the pockets between boulders there should be a rich, porous, moisture-holding soil at least two feet deep. Moisture in sufficient amount is the token of success, even more necessary than shade or part shade.

Most entrancing groups of plants for Rock Gardens are low growing, brilliantly flowering, rather heavily foliaged Perennials. A score of varieties that most readily adapt themselves are listed on this page. For interesting results, the year round, include some dwarf Evergreens like Abelias. Azaleas, Daphne, Junipers, Retinosporas, Yucca, Yews, Pachysandra, Gotoneasters, for their

leas, Daphne, Junipers, Retinosporas, Yucca, Yews, Pachysandra, Cotoneasters, for their touch of evergreen foliage, stability and the floral beauty of the blooming kinds.

Low Annuals should always be added for continuous bloom throughout the Summer. See Page 45 for list.

Rock Garden's Popularity Due to its Appealing Beauty

BEST 20 ROCKERY PLANTS

Wide Range of Blooming Time and Color Represented by List

*Alyssum saxalile compacta (Gold-en Tuft). Forms broad masses of bright yellow flowers in early

Spring. \$2.00 per 10.

Aguilegia hybrida (Columbine).

Wonderful variety of colors late
Spring and early Summer. \$2.50

per 10.
Arabis alpina (Rock Cress). Pro-*Arabis alpina (Rock Cress). Produces dense masses of pure white flowers, early Spring, \$2.00 per 10. Campanula carpatica (Carpathian Bellilower). Clear blue flowers June until October. \$2.00 per 10. Ceratostigma plumbaginoides (Plumbago). Deep blue flowers Summer and Fall. \$3.50 per 10. *Cerastium tomentosum (Snow in Castalana Cartalana Cartal

Summer). Abundance of snow white flowers in early summer; foliage effect silvery-white. \$2.00

foliage effect silvery-write. \$2.00 per 10.

*Dianthus plumarius (Grass Pink).
Pink, purplish or white flowers, nearly all summer; striking foliage. \$1.70 per 10.

*Bright crimson flowers in abundance than to Sentember, \$3.00

dance June to September. \$3.00 per 10.

peris sempervirens (Evergreen Candytuft). Sheet of white; May-June, completely hiding the foliage. \$2.00 per 10.

Linium perenne (Perennial Flax). Beautiful pale blue flowers in midsummer; attractive foliage. \$2.00 per 10.

Myosolis scorpioides (Dwarf Perpetual Forget-me-not). Rich blue flowers early Spring. \$1.50 per 10.

hlox subulata (Moss Pink). White, lilac or pink hiding the moss-like foliage in early Spring. \$2.00 per 10 any color.

Primula veris (Cowslip Primrose). Various shades of lilac, purple violet ranging to yellow, pink and red; early Spring. \$2.50 per 10.

*Sedum acre (Goldmoss). Masses of bright yellow flowers; May. \$2.00 per 10.

Sedum album (White Stonecrop).
White form of preceding. \$2.00

Sedum spectabile (Showy Stone-crop). Immense heads of showy rose colored flowers in late Fall. \$2.00 per 10.

Sedum stoloniferum (Running Stonecrop). Purplish - pink flowers; midsummer. \$2.00 per

Veronica incana (Woolly Speed-well). Cloud of blue flowers; July and August. \$2.00 per 10. Veronica rupestris (Rock Speed-well). Mat of bright blue flowers; early June. \$2.50 per 10. Yacca filamentosa(Adams Needle).

Numerous creamy white flowers in July on long stem arising from base-cluster of lance like leaves. \$3.00 per 10.

* Especially good for crevices in

Five or more of one kind at 10

rates named.
50 plants (not more than 10

50 plants (not more than 10 varieties your selection) 10% reduction on prices listed. 100 plants (not more than 10 varieties your selection) 15% reduction on prices listed.
